DHC Efficiency Check

License and Terms of Use

Copyright © 2026 Politecnico di Milano. Original authors: Benedetta Mura, Paola Caputo, Giulio Ferla (Development Team). Proprietary software, made available free of charge for non-commercial use under the License and Terms of Use below. The software is distributed as a proprietary application for Windows and macOS. The Python source files and the complete development repository are not publicly distributed. The Python components are provided in compiled bytecode form, while certain frontend resources, including JavaScript, HTML and CSS files, may be accessible within the distributed packages. Such availability does not grant any additional rights to copy, modify or redistribute the software beyond those expressly permitted by this License or applicable law.

1. Parties and acceptance

"Licensor" means Politecnico di Milano. "User" means the person or entity that accesses or uses the software. The software is made available only to Users who have accepted this License and Terms of Use.

2. Grant and field of use

The Licensor grants the User a free of charge, non-exclusive, non-transferable and non-sublicensable license to install and use the software in executable form, on the User's own devices, solely for non-commercial purposes, namely research, education and training, and non-commercial assessments of district heating systems against the criteria of the Energy Efficiency Directive. "Non-commercial" means not directed towards commercial advantage or monetary compensation; where the terms of the providers of the weather and geographic data used by the software define commercial use more restrictively, those terms prevail. Any commercial use, including the use of the software in the provision of paid services to third parties, is not licensed under this License and requires a separate written agreement with the Licensor. The license is granted on a perpetual basis for the downloaded version of the software, subject to termination in the event of a breach of these License and Terms of Use.

3. Restrictions

Except as expressly permitted by this License or by mandatory law, the User shall not, and shall not allow third parties to: (a) copy or reproduce the software, in whole or in part; (b) translate, adapt, modify, create derivative works from, or incorporate the software or parts of it into other works; (c) distribute, make available to the public, sell, rent, lend, sublicense or otherwise transfer the software or access to it; (d) provide the software or its functionalities to third parties as a service; (e) remove or alter copyright, proprietary, funding or attribution notices; (f) circumvent access controls, or use automated means to access the platform in bulk, unless authorised in writing; (g) present the software, or any modified or derived version, as its own product or as a product of a third party; (h) extract, store or redistribute, through or with the software, the weather or geographic data of third-party providers beyond what the providers' terms allow.

4. Rights that cannot be excluded

Nothing in this License restricts the rights that mandatory law grants to a person entitled to use a copy of the software and that cannot be excluded by contract, including the making of a back-up copy where necessary for use, the observation, study and testing of the functioning of the software in order to determine the ideas and principles underlying it, and, within the limits and conditions set by law, the acts indispensable to achieve interoperability. Information obtained in this way may be used only for the purposes allowed by law.

5. Source code availability

The Licensor does not provide the Python source files or the complete development repository as part of the software distribution. Certain frontend resources, including JavaScript, HTML and CSS files, may be included in readable form within the distributed packages. Access to such resources does not grant any rights beyond those expressly provided under this License or mandatory applicable law. No right to receive the undistributed source files or the complete development repository is granted.

6. Ownership, reserved rights, funding authority and project partners

The software, including its code, structure, interface, documentation and any updates, is and remains the property of the Licensor. No ownership right is transferred. All rights not expressly granted are reserved by the Licensor. The software is a result of the LIFE project SUPPORT DHC (Grant Agreement No 101119914). This License is without prejudice to: (a) the rights of use granted to the European Climate, Infrastructure and Environment Executive Agency (CINEA) on the non-sensitive results of the project under the Grant Agreement, which are not limited by this License; and (b) the access rights of the project partners under the Consortium Agreement, which are not limited by this License and remain subject to the applicable conditions of that Agreement, including its provisions concerning Software Access Rights. Nothing in this License grants the User any of those rights.

7. Feedback and contributions

The User may send comments and suggestions on the software. By sending them, the User grants the Licensor a non-exclusive, perpetual, worldwide and royalty-free license to use them without any obligation of attribution or compensation. The Licensor does not accept contributions of code unless a written agreement has been concluded with the contributor.

8. User data and results

The User remains responsible for the data entered and for its lawfulness. The results produced by the software are indicative, do not constitute a certification of compliance with the Energy Efficiency Directive or with any other legal requirement, and do not replace verification by qualified professionals or by the competent authorities. The User may use the results for its own non-commercial purposes. Where results are published, the software shall be identified as the source and the funding statement in clause 11 shall be reproduced. The software processes user-provided simulation data locally. Any processing of personal data in connection with access to the distribution platform, communications with the Licensor or use of external services is subject to the applicable privacy notices made available by the respective data controllers.

9. Third-party data, services and components

The software uses third-party data, services and libraries, which remain subject to their own terms.

(a) Weather data (typical meteorological year) are obtained from PVGIS, a service of the European Commission - Joint Research Centre; the source is acknowledged as Photovoltaic Geographic Information System (PVGIS) of the European Commission Joint Research Centre (https://joint-research-centre.ec.europa.eu/photovoltaic-geographical-information-system-pvgis/general-information/usage-conditions-data-protection_en).

(b) Geographic data are provided by the Open-Meteo Geocoding API, based on GeoNames data licensed under CC BY 4.0; attribution: Geocoding data provided by Open-Meteo, based on GeoNames, licensed under CC BY 4.0 (https://open-meteo.com/)

(c) The software accesses PVGIS and Open-Meteo via their APIs and does not incorporate their source code. PVGIS information is used under the applicable JRC usage conditions, with acknowledgement of the source. Access to the free Open-Meteo API is subject to the provider’s non-commercial-use restrictions.

Data retrieved through those services remain subject to applicable terms, including attribution requirements. Any use requiring commercial API access must be separately authorised by the respective provider where required. Retrieved weather series and selected location information are stored locally in the User's project files. The User may export weather data and simulation outputs to local Excel files and print reports to PDF. The software does not automatically publish or redistribute project files or results. Any subsequent sharing by the User remains subject to the applicable third-party terms and attribution requirements.

(d) Libraries and components, including NumPy, Pandas and openpyxl, are listed together with their respective licenses in the Third-party notices.txt file included in the software distribution. This License grants no right over third-party data, services or components and does not release the User from the terms that apply to them. The User is solely responsible for complying with those terms.

10. Names, logos and emblems

The name "DHC Efficiency Check - EED Article 26", the logo and the other distinctive elements of the software are not licensed. They may not be used, registered or combined with other signs without the prior written authorization of the Licensor, except for the use strictly necessary to identify the software as the source of the results. Names, emblems and logos of third parties, including the emblem of the European Union, the LIFE Programme logo and the names and logos of the project SUPPORT DHC and of its partners, are governed by their own rules and may not be used on the basis of this License. The emblem of the European Union is displayed separately and is not combined with the logo of the software.

11. European funding and disclaimer

The software has been developed in the framework of the project LIFE22-CET-SUPPORT DHC (Grant Agreement No 101119914) . Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Climate, Infrastructure and Environment Executive Agency (CINEA). Neither the European Union nor the granting authority can be held responsible for them.

12. Warranty and liability

To the extent permitted by applicable law, the software is provided "as is" and "as available", free of charge, without warranties of any kind, express or implied, including accuracy of results, fitness for a particular purpose, continuous availability and absence of errors. To the extent permitted by applicable law, the Licensor and the authors are not liable for damages arising from the use of, or the inability to use, the software or from decisions taken on the basis of its results. Nothing in this License excludes or limits liability for wilful misconduct or gross negligence, or any other liability that cannot be excluded or limited by law.

13. Term and termination

The license is granted on a perpetual basis, subject to compliance with these License and Terms of Use. In the event of a material breach by the User, the Licensor may terminate the license in accordance with applicable law. Upon termination, the User shall cease using the software and delete all copies in its possession or control, except where retention is required by applicable law. The Licensor may discontinue distribution of the software or the provision of updates and support at any time. Such discontinuation shall not, by itself, terminate licenses already granted. No commitment is made to provide future updates, technical support or continued availability of third-party services. Clauses intended by their nature to survive termination shall remain effective to the extent permitted by applicable law.

14. Governing law and jurisdiction

This License is governed by Italian law. Subject to mandatory rules governing jurisdiction, the courts of Milan shall have exclusive jurisdiction over disputes arising out of or in connection with this License.

15. Acceptance and specific approval

By ticking the boxes provided before accessing or installing the software, the User declares that it has read and accepts this License and Terms of Use. Pursuant to articles 1341 and 1342 of the Italian Civil Code, where applicable, the User specifically approves clauses 3 (restrictions), 12 (warranty and liability), 13 (termination) and 14 (governing law and jurisdiction). Where the User is a legal entity, acceptance must be given by a person duly authorised to bind it.

16. Language

The English text prevails.
